Member Name 1, Student ID 1, Contact Number 1

1 Introduction

Provide a detailed discussion about the process flow. Use a diagram to help in explanation. Provide all necessary investigation about the dataset here...

2 Limitations, Challenges and Problems

In this section, you firstly should discuss why you select a particular model. Why? Answer this first. Then, discuss the performances of models under different settings. You must provide a table for different settings, such as:

3 Proposed Solution

The models developed has been deployed at http://???? The sample screenshots are given below:

4 Future Work

5 Conclusion

There are many research works that employed analytics for retail. One of them is a work reported in [1].
